The accompanying notes are an integral part of these statements.

1. Summary of Significant Accounting Policies
a. Basis of Presentation

The accompanying consolidated financial statements of The Gunma Bank, Ltd. (the "Bank") and consolidated subsidiaries (the "Group") have been prepared from the accounts maintained by the Bank in accordance with the provisions set forth in the Banking Law, the Financial Instruments and Exchange Act of Japan and other applicable rules and regulations and in conformity with accounting principles generally accepted in Japan, which are different in certain respects as to application and disclosure requirements of International Financial Reporting Standards.

In addition, the notes to the consolidated financial statements include information which is not required under accounting principles generally accepted in Japan but is presented herein as additional information.

Certain items have been reclassified from the original consolidated financial statements filed with the Prime Minister as required by the Financial Instruments and Exchange Act for the convenience of readers outside Japan. Certain prior year amounts have been reclassified to comply with the current year presentation.

## b. Consolidation

The accompanying consolidated financial statements include the accounts of the Bank and its significant subsidiaries. The number of consolidated subsidiaries as of March 31,2019 is 6.

Gungin Consulting Co., Ltd. has been included in the scope of consolidation from the year ended March 31, 2019 due to new establishment.

The remaining unconsolidated subsidiaries have been excluded from the scope of consolidation because, judging from their assets, ordinary profit, net income or loss (amounts corresponding to the Bank's equity interest), retained earnings (amounts corresponding to the Bank's equity interest) and accumulated other comprehensive income (amounts corresponding to the Bank's equity interest), they do not have a material effect on the accompanying consolidated financial statements.

As of March 31, 2019, the Bank has 2 unconsolidated subsidiaries, which are accounted for by the equity method, and 1 affiliate, which is accounted for by the equity method.

In reference to the consolidated subsidiaries' closing dates, one company closes accounts at the end of December, while five others close at the end of March.

Consolidation is based on each subsidiary's respective financial statement on the respective closing dates.

For any significant transactions talking place between the consolidated closing date and each subsidiary's closing date, necessary adjustments are made.
c. Trading Account Securities

Trading securities purchased for trading purpose are stated at market value at the fiscal year end with its related cost of sales being determined mainly by the moving average method.

## d. Securities

Securities are classified into four categories: trading, held-tomaturity bonds, equity of unconsolidated subsidiaries and affiliates or securities available for sale. Trading securities are carried at market value and held-to-maturity bonds are carried at amortized cost. Equity of unconsolidated subsidiaries and affiliates are stated at cost and accounted for by the equity method, respectively. Marketable securities classified as securities available for sale are carried at market value with changes in unrealized holding gain or loss, net of the applicable income taxes, recorded as a component of net assets. Securities whose fair value is not readily determinable are stated at cost determined by the moving average method or amortized cost.

Securities comprising the trust asset in money held in trust which is solely managed primarily for the purpose of securities operations are stated at market value.

## e. Derivatives

Derivatives are stated at market value.

## f. Non-current assets

(1) Property, plant and equipment

Depreciation of Property, plant and equipment of the Bank are computed by the straight line method.
The estimated useful lives principally applied are as follows. $\begin{array}{ll}\text { Buildings } & 6 \text { to } 50 \text { years } \\ \text { Equipment and furniture } & 3 \text { to } 20 \text { years }\end{array}$
Depreciation of Property, plant and equipment of the consolidated subsidiaries are principally computed by the straight line method based on the estimated useful lives of the respective assets.
(2) Intangible assets

Intangible assets are depreciated using the straight line method. Software used internally is depreciated over its estimated useful life (mainly five years).
(3) Leased assets

Leased assets in "Property, plant and equipment" subject to finance lease transactions other than those under which the title of the leased equipment is transferred to the lessee are depreciated using the straight line method assuming that the lease period is equal to the useful life. If a guarantee for residual value is prescribed by the lease contract, the residual value is equal to such guaranteed residual value; otherwise, the residual value is zero.

## g. Foreign Currency Translation

Assets and liabilities denominated in foreign currencies are translated into Japanese yen at the exchange rates prevailing at the balance sheet date.
h. Allowance for loan losses

The reserve for possible loan losses is provided in accordance with the internal policies regarding write-offs and allowance for loan losses.
For credit extended to obligors that are legally bankrupt under the Bankruptcy Law, Special Liquidation under the Commercial Code or other similar laws, and to obligors that are effectively in similar conditions, reserves are maintained at $100 \%$ of amounts of claims net of the amounts recoverable from the disposal of collateral and/or the amounts recoverable under guarantees.

For credit extended to obligors that are not yet legally or substantially bankrupt but who are likely to be bankrupt, reserves are maintained at the amount deemed necessary based on overall solvency analyses of the amount of claims less the amounts recoverable from the disposal of collateral and/or the amounts recoverable under guarantees.
For credit extended to obligors with Restructured Loan as defined in Note 4 below, reserves are maintained using Discounted Cash Flow Method ("the DCF Method") if i) the exposure to the obligor exceeds a certain threshold and ii) the future cash flow from the repayment of principal and interest can be reasonably estimated. Under the DCF Method, the reserve is determined as the difference between the book value of the loan and its present value of future cash flows discounted using the contractual interest rate before the loan was classified as a Restructured Loan.
For credit extended to all other obligors, reserves are maintained at rates derived from default experiences for a certain period in the past, etc.

The reserve for possible loan losses is provided based on the result of self assessment on quality of assets which is performed in accordance with the Bank's internal guidelines and is independently reviewed by the internal audit unit.

Other consolidated subsidiaries record a general reserve for possible loan losses by applying the historical loan-loss ratio observed over specific periods, and the specific reserve for certain loans at the estimated uncollectible amount based on an assessment of each borrower's ability to repay.

## i. Provision for directors' bonuses

A provision is provided for the payments of bonuses to directors and Audit \& Supervisory Board Member at the amount of the estimated bonus payments corresponding to the end of the fiscal year.

## j. Accounting method for retirement benefits

In calculating retirement benefit obligation, the Bank uses the benefit formula basis for the purpose of attributing expected retirement benefit payment to the period up to the end of the fiscal year. In addition, the accounting method for actuarial gain and loss is as follows:

Actuarial gain and loss
Actuarial gain and loss are amortized from the year following the occurrence primarily by the straight line method over a fixed period (mainly 10 years) that is shorter than the average remaining service years of the eligible employees.

Meanwhile, certain consolidated subsidiaries calculate liability for retirement benefits and retirement benefit expenses by the simplified method, using the amount of retirement benefit required for voluntary resignations at the end of the fiscal year as retirement benefit obligation.

## k. Provision for directors' retirement benefits

To prepare for the payment of retirement benefits to directors and Audit \& Supervisory Board Member, a reserve is provided at the amount deemed to have accrued at the end of the fiscal year (the estimated amount payable on the balance sheet date based on the bylaws) out of the estimated amount payable as retirement benefits to directors and Audit \& Supervisory Board Member.

## l. Provision for reimbursement of deposits

Provision for reimbursement of deposits accounts is provided for the repayment of dormant deposits which are no longer recorded as liabilities, based on the estimated reimbursement losses that may be incurred should the deposits be withdrawn.

## m. Provision for point loyalty programs

Provision for point loyalty programs is provided for the future usage of points granted to credit card members at the amount estimated to be used in the future periods.

## n. Provision for Contingent Loss

The provision for contingent loss is provided for the payment of charges related to the responsibility-sharing system to Credit Guarantee Corporations at the amount expected to be paid based on the past payment experience.

## o. Reserves under Special Laws

Reserves under the special laws represents a reserve for financial products transaction liabilities and is provided for compensation for losses from securities-related accidents in the amount computed in accordance with Article 46-5 of the Financial Instruments and Exchange Act and Article 175 of the related cabinet order.

## p. Income Taxes

Deferred tax assets and liabilities are determined based on the differences between financial reporting and the tax basis of the assets and liabilities and are measured using the enacted tax rates and laws which will be in effect when the differences are expected to be reversed.

## q. Earnings Per Share

Earnings per share was computed based on the profit available for distribution to shareholders and the number of shares of common stock outstanding during the fiscal year.

## r. Hedge Accounting

Hedge Accounting for Interest Rate Risks
The Bank adopted the standard treatment of the Industry Audit Committee Report No. 24, "Treatment of Accounting and Auditing of Application of Accounting Standard for Financial Instruments in the Banking Industry" ("Report No. $24^{\prime \prime}$ ) issued by Japanese Institute of Certified Public Accountants ("JICPA") on February 13, 2002. Under the standard treatment of the Report No. 24, the Bank applies the deferred method of hedge accounting for qualifying derivative instruments to mitigate the interest rate risks arising from various financial assets and liabilities. Hedge effectiveness is assessed for each designated group of hedged items (such as deposits) and the corresponding group of hedging instruments (such as interest rate swaps). Both of the hedged items and hedging instruments are grouped based on their durations and compared for the testing of effectiveness.

In addition to the above, the Bank applies exceptional treatment for certain interest swap contracts that meet the criteria for the exceptional treatment, under which eligible interest rate swap contracts are accounted for on an accrual basis.

## Hedge Accounting for Foreign Exchange Risks

For foreign exchange risks arising from financial assets and liabilities denominated in foreign currencies, the Bank adopted the standard treatment prescribed in the Report No. 25 issued by JICPA on July 29, 2002. Under that treatment, the Bank applies the deferred method of hedge accounting. The Bank enters into currency-swaps and foreign exchange swaps to mitigate the foreign exchange risks arising from financial assets and liabilities denominated in foreign currencies and assesses, both at the hedge's inception and on an ongoing basis, whether these derivatives are highly effective in offsetting changes in cash flows of hedged items (financial assets and liabilities). Hedge effectiveness is assessed by ensuring that the foreign currency position of the hedging instruments that are designated to hedge foreign exchange risk of the foreign currency-denominated receivables and payables exceeds that of the hedged foreign currency-denominated receivables and payables.

In addition, for available-for-sale securities (except for bonds) denominated in foreign currencies, the Bank applies the fair value hedge accounting for a portfolio hedge on the conditions that the issues of foreign currency denominated securities as hedged items are designated in advance and that the amount of foreign currency payables of spot and forward foreign exchange contracts exceeds the amount of acquisition cost of the hedged items denominated in foreign currencies.

## s. Recognition for Income and Expenses

Income and expenses associated with finance lease transactions are recognized when lease fees are receivable and payable.

## t. Cash and Cash Equivalents

Cash and cash equivalents in the consolidated statements of cash flows consist of cash and deposit with the Bank of Japan which are included in "Cash and due from banks" on the consolidated balance sheets.

## 2. Additional Information

The Bank has applied the "Partial Amendments to Accounting Standard for Tax Effect Accounting" (ASBJ Statement No. 28, February 16, 2018) from the consolidated fiscal year under review.

## 3. Yen and U.S. Dollar Amounts

The Bank maintains its accounting records in yen. The yen amounts included in the accompanying consolidated financial statements are stated in millions of yen, truncating amounts of less than one million yen. Therefore, the totals or subtotals presented in the accompanying consolidated financial statements may not always add up to the sum of the respective account balances. "-" is used to denote nil and " 0 " is used to denote rounding down to zero.

Amounts in U.S. dollars are included solely for the convenience of the reader. The rate of $¥ 110.99=$ U.S. $\$ 1.00$, the approximate exchange rate prevailing on March 31, 2019, has been used. The inclusion of such amounts is not intended to imply that yen have been or could be readily converted, realized or settled in U.S. dollars at that or any other rate.

## 4. Loans and Bills Discounted

(1) Loans and bills discounted at March 31, 2018 and 2019 included the following items: Balance of loans to borrowers under bankruptcy procedures as of March 31, 2018 and 2019 were $¥ 6,499$ million and $¥ 5,907$ million (U.S. $\$ 53,225$ thousand), respectively.

Balance of delinquent loans as of March 31, 2018 and 2019 were $¥ 51,805$ million and $¥ 59,669$ million (U.S. $\$ 537,611$ thousand), respectively.

Loans to borrowers under bankruptcy procedures consist of non-accrual loans on which the payment of principal or interest is well past due or there is no prospect of recovery of the principal or interest from the borrower (excluding the written-down portion of the loan). This category also includes the loans cited in Article 96-1-3 and 96-1-4 of the Corporation Tax Law (Government Ordinance No. 97 of 1965).

Delinquent loans are non-accrual loans, which do not fall under the classifications of loans to bankrupt borrowers or financial assistance loans where interest has been suspended for the purpose of business rehabilitation or debtor assistance.
(2) Balance of loans past due for 3 months or more as of March 31,2018 and 2019 were $¥ 1,732$ million and $¥ 2,757$ million (U.S. $\$ 24,843$ thousand), respectively.

Loans past due for 3 months or more are classified in this category when 3 months or more have elapsed since the due date without the payment of principal or interest. The balance of loans to borrowers under bankruptcy procedures and the balance of delinquent loans are not included in this category.
(3) Balance of restructured loans as of March 31, 2018 and 2019 were $¥ 42,318$ million and $¥ 39,383$ million (U.S. $\$ 354,834$ thousand), respectively.

Restructured loans include loans which have been restructured to support the rehabilitation of certain borrowers who are encountering financial difficulties, with the intention of ensuring recovery of the loans by providing easier repayment terms for the borrowers (such as by reducing the rate of interest or by providing a grace period for the payment of principal/interest, etc.). Excluded from this balance are the balance of loans to borrowers under bankruptcy procedures, the balance of delinquent loans and the balance of loans past due for 3 months or more.
(4) The total balance of loans to borrowers under bankruptcy procedures, delinquent loans, loans past due for 3 months or more and restructured loans as of March 31, 2018 and 2019 were $¥ 102,356$ million and $¥ 107,717$ million (U.S.\$970,514 thousand), respectively.
(5) Bills discounted are accounted for as financial transactions in accordance with JICPA industry Audit Committee Report No.24. The Bank has rights to sell or pledge bank acceptances bought, commercial bills discounted, documentary bills and foreign exchange bought without restrictions. Their total face value as of March 31, 2018 and 2019 were $¥ 36,818$ million and $¥ 36,551$ million (U.S. $\$ 329,325$ thousand), respectively.

## 5. Loan Commitments

Contracts of overdraft facilities and loan commitments are contracts that require the Bank to extend credit to customers up to the prescribed limits in response to customers' application of loan as long as there is no violation of any condition in the contracts. The unused amount relating to these contracts within the limits was $¥ 1,332,065$ million, $¥ 1,325,139$ million (U.S. $\$ 11,939,267$ thousand), respectively at March 31, 2018 and 2019. $¥ 1,271,171$ million, $¥ 1,259,393$ million (U.S. $\$ 11,346,907$ thousand), respectively, at March 31, 2018 and 2019 out of these unused balances were for the contracts of which original contractual term are one year or less, or unconditionally cancelable at any time.
Since many of these commitments expire without being drawn down, the unused amount does not necessarily represent a future cash requirement. Most of these contracts have conditions that the Bank can refuse customers' loan application or decrease the contract limits with proper reasons (e.g., changes in financial situation, deterioration in customers' creditworthiness). At the inception of contracts, the Bank obtains real estate, securities, etc. as collateral if considered to be necessary. Subsequently, the Bank performs periodic review of the customers' business results based on internal rules, and takes necessary measures to reconsider conditions in contracts and/or require additional collateral and guarantees.

## 6. Financial Instruments

(1) The financial instruments and related disclosures

## a. Policy for financial instruments

The Group provides mainly banking services and other financial services including leasing. The Bank engages in fund management including investment in securities and funding in the call market, in addition to the business of accepting deposits and negotiable certificates of deposit as well as provision of loans. With its financial assets and liabilities exposed to interest rate risk, the Bank adopts asset liability management (ALM) to avoid incurring unexpected loss due to fluctuations in interest rates. Thus, the Bank's derivative transactions are not only intended to provide solutions to customers' financial needs, but also to conduct ALM within the Bank.
There are the Bank's consolidated subsidiaries that engage in securities business or banking business.
Also leasing operation is conducted by a consolidated subsidiary.

## b. Nature and extent of risks arising from financial instruments

Financial assets held by the Group comprise mainly loans to clients, which are exposed to credit risk. The Group's financial assets also include securities such as stocks and bonds, which are exposed to credit risk of the issuing entities as well as the risk of market price fluctuations.
Assets and liabilities in the forms of loans, bonds and deposits are exposed to interest rate risk, which is partially hedged by interest rate swap transactions. Likewise foreign currency denominated loans and bonds involve foreign currency exchange fluctuation risk, which is mitigated by making it a rule to match the currency of investment and financing, or hedged by the use of currency swap transactions.

Call money and borrowed money, etc. are exposed to cash flow risk, involving inability to settle payments on due dates as a result of the unavailability of market under certain circumstances.

The Bank conducts derivative transactions including interest rate swaps and currency-swaps in an effort to accommodate clients' financial needs, and as part of the Bank's ALM effort. Besides, the Bank engages in proprietary derivative trading with the purpose to earn short-term spread, subject to risk management including the setting of certain position limits and maximum allowable losses, in an effort to prevent losses in excess of certain threshold.

The Bank applies hedge accounting, The Bank confirms that for hedges of interest rate to which exceptional treatment of interest rate swap is applied, the conditions for exceptional treatment are met and that for hedges of the foreign currency exchange fluctuation risk, foreign currency position exceeds the hedged instruments.

## c. Risk management for financial instruments

The Bank has formulated the Basic Policies of Risk Management and ancillary rules concerning risks, along with the following structure to enforce adequate risk management.

## 1) Credit risk management

The Bank has established its credit management structure based on the internal rules concerning credit risks, including the Credit Policy and the Basic Rules for Credit Risk Management.

Provision of loans and other credit facilities involves credit risk management such as individual credit review, post-origination credit control including the utilization of Borrower Rating System and self assessment, handling of problem loans and monitoring of the credit concentration in particular sectors in loan portfolios.

Credit risks associated with securities investment and market transactions are managed by capturing fair value and credit rating.

Primary credit risk management tools such as credit rating system, self-assessment of the Bank's asset, write-off /reserve provisioning, are developed and examined by Risk Management Department which is independent of the business promotion division and the screening division, and checked by Inspection \& Audit Department, for the purpose of proper check and balance. Executive Committee and the Board of Directors are updated on the latest risk situation regularly and as appropriate.
2) Market risk management

Risk management structure is in place, based on the interna rules concerning market risks including the Basic Rules of Market Risk Management.

For market transactions, the department in charge of market transactions is structured in such a way that they check each other: the Treasury \& Securities Department serves as the front office department in charge of transactions, whereas the Financial Markets \& International Department serves as the middle-office and back-office department in charge of risk management and administrative processing.

In addition, the Bank establishes the risk tolerance and the risk management criteria, conducts monitoring, and reports the monitored information to the ALM \& Profit Management Committee via the Risk Management Department.

The principal financial instruments that expose the Bank to market risk include loans, deposits, securities and derivative transactions. In order to monitor the degree of market risk exposure of these financial instruments and financial obligations, the Bank employs the VaR technique as a uniform indicator tool.

It applies the historical-simulation method to the
computation of VaR. Its VaR model uses a 99.9\% confidence level and a 5-year observation period, with various holding periods depending on the holding purposes.

The total amount of value at risk (VaR) for the Bank as of March 31, 2019 and 2018 was $¥ 78,900$ million $¥ 105,600$ million (U.S. $\$ 711,595$ thousand), respectively.

The Bank conducts back tests by comparing the VaR derived from its measuring model and actual gains or losses, in order to confirm that its measuring model captures the market risk with sufficient adequacy. It should be noted that the VaR represents the amount of market risk under the condition of a certain event probability which was statistically calculated based on historical market fluctuations; therefore the model may not be able to capture sufficiently the risk associated with financial instruments in market turmoil that exceeds historical levels of market fluctuations.

## 3) Liquidity risk management

Risk management structure is in place, based on the internal rules concerning liquidity risks including the Basic Rules of Liquidity Risk Management.

With respect to liquidity risk, the ALM \& Profit Management Committee, which is convened each month, takes every precaution by identifying and analyzing the cash flow status, the balance between investing and funding, interest rate movements and other factors. With respect to cash flow risk, the Bank determines the department in charge of cash flow management, which rigorously manages cash flow periodically (e.g., daily, weekly, monthly) including its overseas bases.

We have also prepared a Contingency Plan to prepare against emergencies, and are taking every precaution including developing systems that enable us to respond appropriately to a wide range of scenarios.

## d. Supplementary explanations on fair value of financial instruments

Fair value of financial instruments are measured based on the quoted market price, if a quoted market price is available, or are measured based on the reasonably estimated value if a quoted market price is not available. Fair value of financial instruments whose quoted market price is not available is calculated based on certain assumptions, and the value might differ if different assumptions are used. In addition, the contract amount of the derivative transactions does not represent the market risk of the derivative transactions.
(2) Fair value of financial instruments

The carrying value on the consolidated balance sheet and fair value of financial instruments as of March 31, 2018 and 2019 as well as the differences between these values are described below. Financial instruments such as non-listed shares whose fair value is not readily determinable are not included in the table.

(Note 1)
Method of estimating fair value
Assets

1) Cash and due from banks

For due from banks without maturity, book value is reported as their fair value. Due from banks with maturity has short-term maturity (1 year or less), and thus book value is recorded as its fair value because of the proximity between the two.

## 2) Securities

Stocks are stated at prices quoted on stock exchanges, while bonds are stated at the reference prices for over-the-counter bond transactions (average) published by Japan Securities Dealers Association. Investment trusts are stated at the official reference price

Privately-placed bonds with the Bank's guarantee are stated at the fair value, calculated by discounting the expected cash flows estimated to reflect the issuing entity's credit risk as of the closing date, using the market interest rate. Notes to securities by holding purpose are stated in "Securities."

## 3) Loans and bills discounted

Interest rates of variable interest rate loans reflect market interest rate at short intervals, and thus their fair values are stated at book value because of their proximity to fair value, unless there are significant changes of the borrowers' credit conditions. Fixed interest rate loans are stated at their fair value as calculated by discounting their cash flows, of which those with OTC interest rate are stated at fair value as calculated by discounting their scheduled cash flow using the interest rate that would be applicable to similar new loans, and are determined by category and by term. Loans not with OTC interest rate are stated at fair value as calculated for each credit rating group, by discounting their future cash flow estimated to reflect the credit risk of each such group, using market interest rate. For loans with shortterm maturity (1 year or less), book value is recorded as its fair value because of the proximity between the two.

In addition, receivables to borrowers that are Bankrupt borrowers, virtually bankrupt borrowers, or at Borrowers threatened with bankruptcy are stated at book value which are deemed to approximate their fair values on the consolidated balance sheets as of the consolidated closing date, minus the current amount of estimated loan losses, which are estimated based upon the current values of estimated future cash flows, collateral, guarantees, or estimated collectible amounts.

Loans undated due to their specific attributes such as loan amount being limited within the value of collateral assets, are stated at book value which are deemed to approximate their fair value in consideration of factors including estimated payment periods and interest rates conditions.

## Liabilities

1) Deposits and 2) Negotiable certificates of deposits

For demand deposit, fair value is deemed to be the amount payable on demand at year end date (book value). For time deposits and negotiable certificates of deposit, fair value is calculated by discounting future cash flows, using interest rates applicable to new deposits and market interest rate, respectively. For loans with short-term maturity (1 year or less), book value is recorded as its fair value because of the proximity between the two.
3) Borrowed Money

The carrying amount of borrowed money with floating interest rates approximates fair value because the market rates are promptly reflected in the floating interest rate and the credit risks of the Bank and its consolidated subsidiaries have not changed significantly after borrowing. The fair value of borrowed money with fixed interest rates is determined by discounting future cash flows at the rate that would be applied for similar new contracts. The carrying amount of borrowed money with maturity of less than one year approximates fair value because of its short maturity period.

## Derivative Transaction

Derivative transactions are described in "Derivative Financial Instruments Transactions."
(Note 2)
Financial instruments whose fair value is not readily determinable are as follows: These are not included in "Assets 2) Securities" of the information on the fair values of financial instruments.

Independent Auditor's Report

## The Board of Directors <br> The Gumma Bank, Ltd.

We have audited the accompanying consolidated financial statements of The Gumma Bank, Lsd, and its consolidated subsidiaries, which comprise the consolidated balance sheet as at March 31, 2019, and the consolidated statements of income, comprehensive income, changes in net assets, and cash flows for the year then ended and a summary of significant accounting policies and other explanatory information, all expressed in Japanese yen.

## Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in Japan, and for designing and operating such internal control as management determines is necessary to enable the preparation and fair presentation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error.

## Auditors Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in Japan. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.
An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether doe to fraud or error. The purpose of an audit of the consolidated financial statements is not to express an opinion on the effectiveness of the entity's internal control, but in making these risk assessments the auditor considers intemal controls relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.
We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion
In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of The Gunma Bank, Ltd, and its consolidated subsidiaries as at March 31, 2019, and their consolidated financial performance and cash flows for the year then ended in conformity with accounting principles generally accepted in Japan.

Comrnience TransLation
We have reviewed the translation of these consolidated financial statements into U.S. dollars, presented for the convenience of readers, and, in our opinion, the accompanying consolidated financial statements have been properly translated on the basis described in Note 3.
